

The United Policyholders Roadmap to Preparedness Flash Drive

Inventory the contents of your home with UP's help.

What is it?

United Policyholders' *Roadmap to Preparedness Flash Drive* will help you create the detailed contents inventory you will need to submit to your insurance company if your home is ever damaged or destroyed. It is a portable, keychain-sized preparedness tool that can be plugged into any computer. The flash drive includes:

Comprehensive spreadsheets, organized by rooms in a typical dwelling. The spreadsheets include common items that are found in most homes, but can be easily customized to include items that are unique to your home.

A sample completed inventory that was used to settle an insurance claim. This sample can be used as a reference while creating your own.

Links to United Policyholders' preparedness and loss mitigation tips.

Extra space to store important documents and digital photos of your home.

How do I get one?

Donate \$10 or more to United Policyholders, and request a Roadmap to Preparedness Flash Drive. Mail a check to the address below (write "R2P flash drive" in the check memo), or call 415-393-9990 to donate by credit card.

Who created it?

The *Roadmap to Preparedness Flash Drive* was created with help from disaster victims who had to struggle to remember the contents of their home after it was damaged or destroyed.

Why use it?

Because creating a complete list of your belongings after a loss is difficult, emotionally painful and tedious. UP's tool makes it easy to create this useful record today.

Remember: Doing anything to prepare is better than doing nothing at all.
